HYDRAULICS & PNEUMATICS 1977 EDITORIAL INDEX

Out-of-print copies are available in complete volumes as positive microfilm copies from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, MI 48103.

Aerospace Equipment

F-15 eagle hydraulic system increases ability of aircraft to survive, D. E. Nothstine and R. W. Wasserman, **Oct. 162**
Mechanical and electrical signals assure failsafe operation of aircraft speed brakes, F. J. Kwantes, **Jul 67**
Supersonic Concorde has designed-in reliability, A. A. Ackerman, **Dec 51**

Basic Technology

Basic seal materials you should know, E. Jacobs, **Nov 64**
Can the efficiency of open circuit hydraulic systems be increased? A. Myers, **Oct 148**
Control pack combines circuit valves and flow passages, E. Jacobs, **Sep 100**
Cylinders for profit-making designs, T. Goldoftas, **Mar HP-1**
Determining filter requirements for fluid power components, E. C. Fitch and S. K. R. Iyengar
- Part 1: Multipass filter and contaminant-sensitivity tests, **Jul 74**
- Part 2: Filter selection procedure, **Sep 94**

Electrical controls for fluid power systems, M. Szabo
- Part 1: Electromechanical limit switches, **Jun 54**
- Part 2: Proximity switches, **Aug 66**
- Part 3: Pressure switches, **Sep 110**
- Part 4: Pressure switches (cont.) **Oct 166**
- Part 5: Temperature switches, **Dec 62**

Geo-metrics: The metric application of geometric tolerancing, book review, **Aug 10**
How to analyze steady-state power losses in a hydraulic system, H. G. Federlein
- Part 1: Power losses, **May 82**
- Part 2: Flow through actuators, Servovalves, **Jun 61**
- Part 3: Dynamic analysis, **Jul 70**

How to solve strainer, screen, mesh problems, F. Caplan, **Sep 116**
Installation, operation, and maintenance of hydraulic systems, A. Bray
- Part 1: Checks for operation, **Sep 92**
- Part 2: Checks for installation and start-up, **Oct 196**
- Part 3: Tips about care and changing of oil, **Feb 59**
- Part 4: System accessories, **Apr 77**

Low-cost constant flow hydraulics for mobile equipment, R. E. Stauffer, **Jun 64**
Managing the industrial transition to metric: the LLL plan, **Apr 10**
Nomograph solves compression/expansion problems, F. Caplan, **Feb 62**
Product reliability discussed at OSU, **Apr 38**
Quick-connect couplings couple conductors quicker, N. R. Stull, **May 74**
Sieves verify calibration of automatic particle counter, P. J. Barke, **Feb 64**
Sources and control of hydraulic pressure shocks, V. Fencl, **May 80**
Using Bernoulli's equation in hydraulic circuit design, G. L. Johnson, **Nov 61**
View from the field, S. Ellis
- Compare power consumed, **Mar 128**
- Optimizing horsepower consumption, **Apr 116**
- Compare apples to apples, **May 102**
- What are the consequences, **Jul 102**
- Pressure drop, **Sep 156**
- Pressure drop, **Oct 180**
- Who needs dead head horsepower, **Nov 110**
- It's all horsepower vs. time, **Dec 74**

What's your ISO VG IG? **Dec 10**
What you should know about rotary actuators, I. Chang, **Dec 66**
What you should know about rotating couplings S. Crapnell, **Feb 50**
The year of SI
- Concepts of force and mass, Walter Ernst, **Jan 10**
- Considerations of specific weight, density, specific gravity, and pressure, Walter Ernst, **Feb 14**
- Part 1: Length, velocity, and acceleration, R. W. Henke, **Mar 9**
- Part 2: Area, volume, and flow rate, R. W. Henke, **Apr 48**
- Part 3: Force and pressure, R. W. Henke, **May 10**
- Part 4: Force and mass, R. W. Henke, **Jun 16**
- Part 5: Work, energy, and power, R. W. Henke, **Aug 76**
- Part 6: Work, energy, and power, continued, R. W. Henke, **Sep 18**
- Part 7: Angular displacement, angular velocity, and angular acceleration, R. W. Henke, **Nov 26**
- Part 8: Rotational motion: flow rate, pressure, and torque, R. W. Henke, **Dec 44**

Books, Education, and Training

Basic seal materials you should know, E. Jacobs, **Nov 64**
Electrical controls for fluid power systems, M. Szabo
- Part 1: Electromechanical limit switches, **Jun 54**
- Part 2: Proximity switches, **Aug 66**
- Part 3: Pressure switches, **Sep 110**
- Part 4: Pressure switches (cont.) **Oct 166**
- Part 5: Temperature switches, **Dec 62**

Fluid power update seminar, **Oct 33**
Geo-metrics: the metric application of geometric tolerancing, book review, **Aug 10**
How to analyze steady-state power losses in a hydraulic system, H. G. Federlein
- Part 1: Power losses, **May 82**
- Part 2: Flow through actuators, servovalves, **Jun 61**
- Part 3: Dynamic analysis, **Jul 70**

How to solve strainer, screen, mesh problems, F. Caplan, **Sep 116**
International conference emphasizes theoretical analysis, **Jul 50**
Managing the industrial transition to metric: the LLL plan, **Apr 10**
Metric speakers, **Mar 12**
Nomograph solves compression/expansion problems, F. Caplan, **Feb 62**
Pneumatic mechanization, book review, **Sep 30**
Product reliability discussed at OSU, **Apr 38**
Reference handbook for the proper usage of metric-SI in science and engineering, book review, **Mar 12**
Using Bernoulli's equation in hydraulic circuit design, G. L. Johnson, **Nov 61**
What you should know about rotating couplings, S. Crapnell, **Feb 50**
The year of SI
- Concepts of force and mass, Walter Ernst, **Jan 10**
- Considerations of specific weight, density, specific gravity, and pressure, Walter Ernst, **Feb 14**
- Part 1: Length, velocity, and acceleration, R. W. Henke, **Mar 9**
- Part 2: Area, volume, and flow rate, R. W. Henke, **Apr 48**
- Part 3: Force and pressure, R. W. Henke, **May 10**
- Part 4: Force and mass, R. W. Henke, **Jun 16**
- Part 5: Work, energy, and power, R. W. Henke, **Aug 76**
- Part 6: Work, energy, and power, continued, R. W. Henke, **Sep 18**
- Part 7: Angular displacement, angular velocity, and angular acceleration, R. W. Henke, **Nov 26**
- Part 8: Rotational motion: flow rate, pressure, and torque, R. W. Henke, **Dec 44**

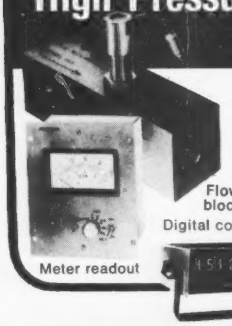
Circuit Design

Air-oil system automates sausage stuffer, F. H. Middleton, **Oct 153**
Can the efficiency of open circuit hydraulic systems be increased? A. Myers, **Oct 148**
Checklist for choosing fire-resistant fluids, E. A. Baniak,
- Part 1: **Aug 55**
- Part 2: **Sep 107**

Concentric hydraulic rams lift drill pipe, D. Russell, **Apr 61**
Detented valves simplify air control circuit, S. Ring, **May 87**
Dual-pressure circuit saves energy, speeds work cycle, R. J. Wolf, **Jul 63**
F-15 eagle hydraulic system increases ability of aircraft to survive, D. E. Nothstine and R. W. Wasserman, **Oct 162**
Feedback circuit keeps paver straight and level, J. Phillips, **May 71**
Fluid power maintenance: common sense, N. R. Stull
- Part 1: Basic facts, **Aug 57**
- Part 2: Other system considerations, **Sep 103**

Gas-charged hydraulic cylinders smooth rough ride, M. E. Pinter, **Aug 51**
Hydraulic loopers provide constant interstand tension control for hot strip steel, F. R. Mastnock and R. A. Ponter, **Feb 56**
Hydraulic tree shaker harvests crops automatically, D. L. Peterson and G. E. Monroe, **May 84**
Hydro-pneumatic modifications automate tracer lathe, D. E. Roth, **Aug 59**
Idling cylinders synchronize main cylinders, A. D. Tipton, **Nov 72**
Low-cost constant flow hydraulics for mobile equipment, R. E.

High Pressure Flow Meter for oils, fuels, liquids



Low-cost turbine flow block—reads flow of hydraulic circuits, test stands, machine tools, etc., on Model GP-45 meter readout or Model 5100 digital counter. Flow —1-200 GPM. Max.—5,000 PSI.

Send today for Bulletins 505, 104, 301

151 on Reader Service Card

Rugged pressure gauges for 0 to 7,500 PSI

Measure hydraulic or other liquids—models with ranges from 0 to 7,500 PSI. Withstand extreme conditions of overpressure, vibration, shock and surge. One moving part. Dials also read in metric units.

Send today for Bulletin 500

Cylinders

NEW in the Hydraulic Golden Ring Series for all Industrial Applications

SINGLE-ACTING SOLID PLUNGER

10 TON RC-104 4⅛" Stroke
25 TON RC-252 2" Stroke
50 TON RC-502 2" Stroke

SINGLE-ACTING HOLLOW PLUNGER

12 TON RCH-123 3" Stroke
60 TON RCH-606 6" Stroke

Solid Plunger 50 TON RR-506 6⅛" Stroke

DOUBLE-ACTING HEAVY DUTY

ENERPAC offers Hydraulic Cylinders in capacities 2 thru 200 tons for use in Industrial applications. FREE copy of catalog covers complete cylinder line. Write ENERPAC, Butler, WI 53007.

When you needed them yesterday

Fast delivery, competitive pricing, no minimum quantities, and always the highest quality have made Mikron Products one of the leading manufacturing specialists in fabric reinforced and custom molded mechanical packing.

Mikron can supply off-the-shelf delivery of fabric reinforced nitrile and homogeneous vees, u-cups, and piston cups, and also offer capabilities in silicone, viton*, viton asbestos and other synthetic materials. So if you're in a delivery/cost vacuum and need your order in days, not months, at realistic prices, call Mikron Products – the people who still believe in personal service.

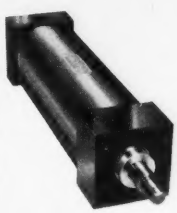
LIN-ACT®
SERIES "A" CYLINDERS
11 Big Advantages



- HEAD and CAP – Anodized Aluminum Alloy
- TUBE END SEALS – Asbestos with Vinyl Binder
- PISTON SEALS – Lip Type Seals (Buna "N") – Pressure energized, wear compensating
- PISTON – Aluminum Alloy
- TUBE – "Hard Coated" Aluminum Alloy "File hard" coating resists scoring, abrasion and corrosion
- PISTON ROD – Ground, Polished and Hard Chrome Plated Steel
- TIE RODS – High Strength Steel
- ROD BUSHING – Aluminum Alloy – Removable without disturbing torque on tie rods
- ROD SEAL – Lip Type (Buna "N") – Pressure energized, wear compensating
- ROD WIPER – Quad Ring (Buna "N")
- PERMANENT LUBRICATION.

Cost Saving Ways To Improve Your Hydraulic Systems...

ZINGA *SUCTION & RETURN* LINE SYSTEMS:

SAVE on installation labor, material and inventory costs.

REDUCE velocities, noise and heat levels, number of connections and weight.

INCREASE line sizes easily and economically.

ELIMINATE swivel fittings.

Port connections: 1" to 4" • Hose connections: 1" to 4"

Get the facts. Request bulletin and prices.

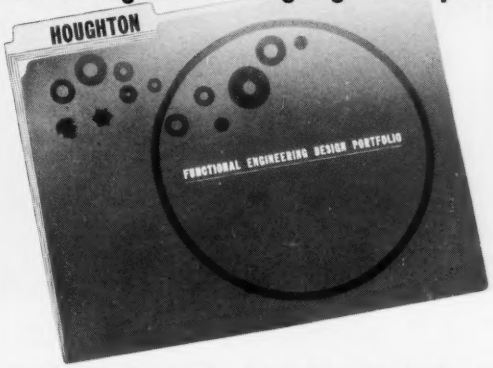
FREE FILE

from Houghton on designing rubber parts



KEEP DESIGN TIPS AT YOUR FINGERTIPS with Houghton's custom file containing 4 brochures on VIX-SYN® rubber compounds, Design Do's and Don'ts with sketch sheet, and comprehensive data on part design. See why designing in rubber is unlike designing with plastics or metals. Compare properties of base rubbers. Avoid overdesign, learn where, how and why which polymers cost less. Send today for your FREE copy. E. F. HOUGHTON & CO., 303 W. Lehigh Ave., Phila., Pa. 19133.

HOUGHTON **Your Hot Line to Custom Molded Rubber Parts is *The Houghton Line***

SIDE-MOUNTING!

FILLER-BREATHER-STRAINER ASSEMBLIES

TYPE 750

FOR HYDRAULIC AND LUBE OIL RESERVOIRS

When space limitations or easier filling requires mounting on the side or end of the reservoir . . . here is a practical, low-cost solution.

Furnished as completely assembled packaged units, with all gaskets and fasteners, ready for immediate installation.

Eliminates the high cost of special castings or welded shapes and enables the complete reservoir, including cleanout plate, to be fabricated from flat sheet metal.

ROD BOOTS for any type of cylinder

...WITH NO TOOLING CHARGE!

Ideal for all types of hydraulic and pneumatic cylinders, GORTITE flexible covers are available in 45 standard sizes (rods ½" to 10" diameter) *without tooling charges!* A variety of rugged neoprene or elastomer coated fabrics make them suitable for any application or environment. Covers also are adaptable for use with various ends, zippers, breathers and tie strips. Write for new bulletin RB-200.

GORTITE Rod Covers Protect Against Chips, Grit, objects . . . Extend Seal Life

GORTITE®

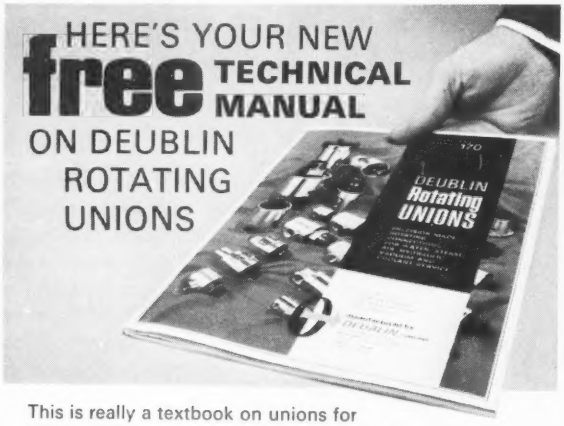
HERE'S YOUR NEW **free** TECHNICAL MANUAL ON DEUBLIN ROTATING UNIONS



This is really a textbook on unions for water, steam, air, vacuum, hydraulic, coolant and other services for the equipment you make or use, and Deublin brings it to you with complete engineering data and dimensional drawings to help you in making machine layouts. It's 32 pages in 4 colors . . . information to help you get trouble-free service and reduce your "downtime" and keeps maintenance to a minimum. Four color cutaway photos clearly illustrate internal construction. This catalog includes a cross reference table which recommends models designed for specific types of service. Torque pressure and speed ratings also included. No engineer should be without this information at his finger tips. *Send for your FREE copy today.*

"Look for us in the Yellow Pages under Rotary Joints."

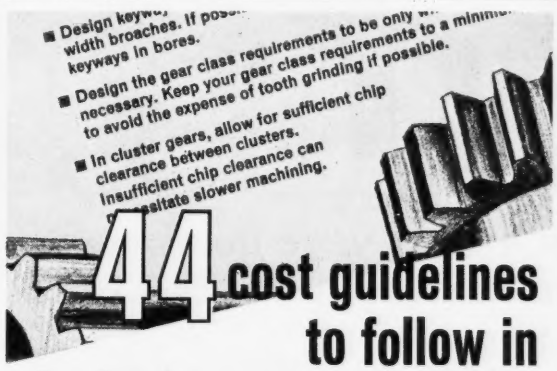
■ Design keyw... width broaches. If poss... keyways in bores.
■ Design the gear class requirements to be only ... necessary. Keep your gear class requirements to a minim... to avoid the expense of tooth grinding if possible.
■ In cluster gears, allow for sufficient chip clearance between clusters. Insufficient chip clearance can ...esultate slower machining.



44 cost guidelines to follow in designing gears & shafts . . . FREE

We've been manufacturing gears and shafts for over 50 years. We know the important cost factors involved in producing such parts. Material selection. Tolerances. Finish. Etc. You should too. Our design guide outlines 44 different manufacturing/cost factors to consider. One of them just might make your design more practical. Maybe less costly. Or faster, easier to produce. Send for your free copy of this valuable booklet.

CUT YOUR COSTS for Maintenance and Repair of SERVOVALVES PUMPS and MOTORS

- YOU SAVE MONEY . . . you pay only for service and parts necessary.
- YOU SAVE TIME . . . we have on-the-shelf parts inventory for minimum turnaround.
- YOU SAVE PAPERWORK . . . our single source repair service for all makes reduces shipping and billing.
- YOU SAVE ON REPLACEMENTS . . . we have new or rebuilt valves and major sub-assemblies in stock.

We repair or replace only the defective parts . . . not the complete assembly, unless necessary . . . Saving you Time and Money.
You are charged only the price we quoted. If additional work is required you are notified before work is started.

All-stainless high pressure check valves
Semi-soft seat, with PTFE disk, provides positive sealing
For high pressure liquid or gas applications, new check valve line is rated up to 15,000 PSI working pressure at 375°F maximum. Built entirely of 303 stainless steel. 1/4, 1/2, 3/4, 1 inch port sizes. Write for complete catalog.
